

PROSPECTUS OF THE "CONGRESSIONAL
UNION" AND "APPENDIX," &c.

The first, which respectfully informs the public that, with the approaching session of Congress, they will begin the publication of the "Congressional Union" and "Appendix." The first will contain a full and accurate history of the daily proceedings of both branches of the national legislature. It will be compiled with such care, that every citizen who is interested in the public affairs will find it a complete synopsis of their proceedings, and a most valuable book of reference upon all questions which arise before them.

ed at length by a full and able corps of congressional reporters, and revised before publication by the authors, whenever it is requested. These reports of works will be strictly impartial, and are intended to be interesting and useful to the man of business and to the politician of the one party, as well as to the other.

It may be said, without exaggeration, that the session of Congress is destined to be one of the most important which has ever witnessed the administration of the government. It is the last session of the session which will develop the true character of the present administration. Its measures will determine the character of our institutions for years to come. Some of the most important questions which are connected with our foreign relations, and our domestic concerns, will be presented for their consideration.

The final measure of ratifying the constitution of Texas, which is to consummate her admission into our Union, and the nomination of her members to our public councils—every measure which affects the Oregon question—our relations with Great Britain, as well as the final decision on the revived Texas claim treaty—these and other measures which will be presented and connected with our foreign relations will come under the review of the approaching Congress. Most of the eminently important

which relate to our internal concerns—the adoption of the tariff—the adoption of the best mode for preserving the public moneys—a variety of commercial and political questions—these are the subjects on which we have to legislate, and these and others will constitute a mass of business which is calculated to command much of the time of Congress, and much of the attention of the people. They will all be reported by the "Congressional Union."

The Daily, Semi-Weekly, and Weekly Union, as usual, embrace an interesting variety of work on political, scientific, and literary subjects, and with current news of the day. The editor will be glad to receive from his high friends the improvements and suggestions which will tend to the betterment of "The Union." He finds many of our ablest men in this city. The administration has treated with it a considerable accession of talents. Sincere and distinguished members of the democratic party are anxious to render it. Some of them have liberally contributed to its support, and will benefit; and we hope to enlist others in our ranks. Besides, the time is not far distant when the editor intends to call other talents to his assistance. He wishes, to make his paper worthy of the increased circulation which he is desirous to obtain, and which his position enables him to employ; with the official and other materials placed within his reach, and with the aid of the correspondence which he is attempting to establish in foreign countries, a

support of his country. In undertaking the task he knew he had many difficulties to overcome, and many lessons to learn, many sacrifices to encounter, and he knew that, amid the arduous cares of a new task, he could not at first do justice even to himself; his zeal had never flagged. What enthusiasm for his industry can effect, will be fully accomplished. Some errors he may have already committed, but upon one point, he can speak with great pride and with equal freedom. The men who are administering this government are working-men, active as he believes, to do their duty, to serve their country, to carry out the pledges under which the President was elected, and the great principles of the

ty. So long as the administration is conducted in this spirit, and upon those principles, he is prepared to co-operate with them in the public service, as to give them, as he promised in his prospectus, a fair, liberal, and efficient support."

We feel a deep sense of gratitude for the prompt manner in which our political friends in every section of the country have already come forward to sustain the "Union."

May we not hope that our friends throughout the United States will continue to assist our labor, and prevail upon their friends to take some other edition of the "Union."

As this will be the long session of Congress, and will probably last eight months, we beg to
